

Download Antiviral Agents Volume 67 Advances In Pharmacology

Flavonoids occur as aglycones, glycosides, and methylated derivatives. The basic flavonoid structure is aglycone (Figure 1). Six-member ring condensed with the benzene ring is either a γ -pyrone (flavonols and flavanones) or its dihydroderivative (flavonols and flavanones). Nelfinavir (brand name Viracept) is an antiretroviral drug used in the treatment of the human immunodeficiency virus (HIV). Nelfinavir belongs to the class of drugs known as protease inhibitors (PIs) and like other PIs is almost always used in combination with other antiretroviral drugs. Monolaurin, also known as glycerol monolaurate, glyceryl laurate or 1-lauroyl-glycerol, is a monoglyceride. It is the mono-ester formed from glycerol and lauric acid. Natural Cure Labs is the premier manufacturer of Monolaurin - an antiviral, antibacterial, and antimicrobial supplement derived from coconuts.
