

Download Black Powder Loading Manuals For Shotgun Shells

In cooperation with Magtech, manufacturer of brass shotshells, we are proud to announce the publication of Reloading Brass Shotshells. This manual was written by famed industry expert Mr. R.H. VanDenburg, Jr. Handloading or reloading is the process of loading firearm cartridges or shotgun shells by assembling the individual components (case/hull, primer, powder, and bullet/shot), rather than purchasing completely assembled, factory-loaded ammunition. The term handloading is the more general term, as it refers to assembly of ammunition using ...the two i have i kinda got for free as alot of components came with them. 100's of hulls, powder, shot, wads, primers. 20 and 12 ga. the 12 has a metal base and seems more stout. i decap-size the 20's on it b/c the 20 base is plastic. i dont want to break the thing. in one evening i had the things figured out. just dont slide the shot-powder ...I am attracted by the price of the lee load all 2 vs the seemingly tank-like build of the mec 600... any views? also I just wanna shoot trap at the range with my son--do I need a reloading book with recipes or can someone give me a basic recipe?
