

Download Creative Growth Games

Open, Creative Mathematics. Mathematics is a beautiful, open, creative, and multi-dimensional subject. But school mathematics is often uninspiring, procedural and one-dimensional – it is all about memorizing methods and procedures. The Creative Industries Clusters Programme is bringing together world-class research talent with companies and organisations from across the UK's four nations in a first-of-its kind research and development investment. The UK market for Games was worth an estimated £5.7bn in 2018, and the London Games Festival in April 2019 brought together games companies, investors and gamers. Our mission is for England's creative businesses and talent to be the most successful and innovative in the world: a platform for new voices, building economic growth that benefits our nation
