

Download George Stubbs: Art, Animals & Anatomy

In 1754 Stubbs visited Italy. Forty years later he told Ozias Humphry that his motive for going to Italy was, "to convince himself that nature was and is always superior to art whether Greek or Roman, and having renewed this conviction he immediately resolved upon returning home". Stubbs also painted a wide variety of other animals, including the lion, tiger, giraffe, monkey, and rhinoceros, which he was able to observe in private menageries.
