

# Download How To Lie With Maps

In the theory of Lie groups, the exponential map is a map from the Lie algebra  $\mathfrak{g}$  of a Lie group  $G$  to the group, which allows one to recapture the local group structure from the Lie algebra. History. Lie algebras were introduced to study the concept of infinitesimal transformations by Marius Sophus Lie in the 1870s, and independently discovered by Wilhelm Killing in the 1880s.
