

Download Plaster Coving Template

How to fit coving. In a previous post I talked about coving and cornice and the types of coving, this post deals with fitting coving. I'm going to tell you how to fit coving based on the standard 127 mm or 90 mm concave coving, but the principle is the same for all coving / cornice. Place template No. 1 in the inside corner and under the cap strip (Fig. 4). With the template pressed firmly into the cove stick, trace around the part of the template which is on the felt paper. Hawke Paint is a premium Canterbury painter with strong relationships with Christchurch builder and commercial project management companies and have a no-nonsense reputation for doing what we say we will do. Common Carpentry Terms you may come across on the building site and what they mean. What does 'plumb' mean? What is a 'router'!? Below is a list of Carpentry Terms, a 'carpentry dictionary', full of words you may come across on site or in the hardware shop that you don't know the meaning of.
