

Download The Spaceflight Vault A History Of Nasa S Manned Missions

Skylab was the first space station launched and operated by NASA, occupied for about 24 weeks between May 1973 and February 1974. It was the only space station that the United States has operated exclusively. In 2017, NASA commissioned an internal audit of its surviving inventory of suits and the progress it's making upgrading and replacing them. The findings were not good. The origins of the Shuttle–Mir Program can be traced back to the Apollo–Soyuz Test Project, that resulted in a joint US/Soviet mission during the détente period of the Cold War and the docking between a US Apollo spacecraft and a Soviet Soyuz spacecraft in 1975. In the new documentary Apollo 11, freshly unearthed footage of the 1969 lunar mission, with the help of a community of space nerds, will tell the story of the historic event in a new way, making ...
